Winstone Glass frameless solutions can enhance any building or home – sometimes the best kind of view is the one where you see nothing at all.

All Winstone Glass balustrades are designed to meet the new safety standards. For balustrades and deck enclosures, toughened or laminated safety glass provides a functional barrier that is also easy on the eye. Panels can be shaped, frosted, coloured or screenprinted to add extra personality to your surroundings. All the exposed edges of the glass are polished for safety to give them a fine quality finish.

We have a huge range of fittings and posts to achieve a fully frameless or semi-frameless look.

It's even possible to use frameless glass as a feature wall or for flooring – if you can dream it, we can make it.

Frameless Solutions

innovators in glass

Frameless and semi-frameless glass for pools, stairways and balustrades

Party with the mates or kids round for a summer splash – keep safe around the pool with our toughened safety glass.

Our glass balustrades are suitable for a number of uses, including:

– Decks

– Stairways

– Balconies

– Handrails

– Pool surrounds

For all your residential and commercial glazing needs you can trust Winstone Glass.

Simplicity is the key to great interior design and nothing could be simpler than the clean, clear lines of frameless glass.

With over 100 years' experience we are true innovators in glass solutions. Our experience and care for the craft makes all the difference for your project.

Give your home an extra sense of space with the stylish, clean look of polished glass. Simplicity is the key to great interior design, and nothing could be simpler than the clean, clear lines of frameless glass.

When you need a barrier that doesn't intrude, frameless glass is the leading contender.

For balustrades, bathrooms, staircases, feature floors and walls, frameless glass has become a building material that expresses quality and contemporary design values in the home.
