

**Choosing Winstone Glass for your bathroom, showers and mirrors for an elegant appearance, with unrivalled form and functionality.**

Our fittings allow doors to be pivoted or hinged, free-swinging or self-closing depending on the type and design of the shower. Door handles are finished to suit the fittings, and a variety of designs are possible, such as those that double as a towel rail.

Glass side panels are supported by fittings or by aluminium glazing channels and supplied in matching colours for your home.

We recommend finalising the design of your frameless glass shower at an early stage of the development of your bathroom to get the best of elegant appearance, functionality and economy.

Solutions to enhance your bathroom experience

innovators in glass

Our experience and knowledge with bathroom finishes can make all the difference to your project.

We use toughened Safety Glass to ensure maximum safety, thermal and mechanical strength and to meet all NZ Standards.

With over 100 years' experience we are true innovators in glass solutions. Our experience and care for the craft makes all the difference for your project.

The high strength and safety of Toughened Safety Glass allows the use of relatively small metal fittings to provide a clean lined frameless shower.

A variety of glass types are available, with 8mm or 10mm clear glass being the standard. The glass is always Toughened Safety Glass to ensure maximum safety, thermal and mechanical strength and to meet NZ Standards.

Glass panels can also be shaped or screenprinted to meet the designers' special requirements.

The stylish look and simple lines of polished glass can help make the smallest room in your house the most impressive from every angle.

Winstone Glass mirrors and showers are designed to maximise space and open up those smaller areas.

We only use 10mm clear Toughened Safety Glass in our showers with minimum framing on the edges, so our glass gives a clear finish which makes cleaning easy.

The elegance of Winstone Glass shower doors and enclosures is in the simplicity of their design. The stylish clean look of simple lines and polished glass will be an elegant addition to your bathroom.

Winstone Glass has long been the experts in designing and installing elegant, frameless glass shower enclosures.
